

# FERRARA

PHOTO: TIIA HURME

In 2006 Ferrara became our third generation of Finnish National Champion Mares. Never shown before, she was indeed the dark horse of the day and convinced the stern judges from Belgium, Russia, and Poland.

Ferrara's dam the lovely Fera, was by Sanadik's full brother El Mokari. Ferrara is in every inch a typical Hadban Enzahi mare, referring to the great Marbach broodmare sire and she has been producing accordingly.

Our strong Om El blood has outcrossed superbly with Russian stallions, resulting in big horses with lots of movement, neck and bone, but most important, not losing type. Ferrara produced the outstanding filly Feritale by Aranik Kossack (Nikel x Arabella by Balaton) while her mother Fera left us her masterpiece Feronia by Colorado II (Kubinec x Nebraska IV by Kilimandscharo).

Also our show jumper, the hardworking Estopasan daughter Ferosa, had time for a filly, by the above mentioned Colorado. We aptly named her Sniegtjinka, "Snowflake."

In the middle of a financial crisis, quality sells. All foals have been sold before weaning, but we hope to retain Ferrara's next foal by Aranik, due this summer.

(\*Sanadik El Shaklan x Fera by El Mokari)
